Monetary Policy

The Surge in low cost current Account and Savings Account (CASA) deposits into the banking system post demonetization, coupled with aggressive reduction in term deposit rates, aided the pass through of policy rate cuts to lending rates of commercial Banks. The speed of transmission gathered momentum from November 2016 with lending rates falling faster than term deposits rates. This also reflected the still subdued demand for credit and the availability of alternative non Bank sources of Financing. The Extent of reduction in lending rates on outstanding loans to be relatively small though, due to sticky interest rates on base rate linked loans and the 1 year reset period of MCLR linked Loans.
